

Contents

1	Introduction	1
1.1	Examples of Nano Image Analysis	4
1.1.1	Example 1. Morphology	4
1.1.2	Example 2. Spacing	6
1.1.3	Example 3. Temporal Evolution	7
1.1.4	Example 4. Motions and Interactions	9
1.2	How this book is organized	11
1.3	Who should read this book	12
1.4	Online book materials	12
	References	12
2	Image Representation	15
2.1	Types of Material Images	15
2.2	Functional Representation	19
2.3	Matrix Representation	23
2.4	Graph Representation	26
2.5	Set Representation	27
2.6	Example: Watershed Segmentation	30
	References	32
3	Segmentation	35
3.1	Challenges of Segmenting Material Images	35
3.2	Steps for Material Image Segmentation	36
3.3	Image Binarization	38
3.3.1	Global Image Thresholding	38
3.3.2	Local Image Thresholding	39
3.3.3	Active Contour	42
3.3.4	Graph Cut	45
3.3.5	Background Subtraction	46
3.3.6	Numerical Comparison of Image Binarization Approaches for Material Images	48

3.4	Foreground Segmentation	51
3.4.1	Marker Generation	52
3.4.2	Initial Foreground Segmentation	55
3.4.3	Refine Foreground Segmentation with Shape Priors	56
3.5	Ensemble Method for Segmenting Low Contrast Images	58
3.5.1	Consensus and Conflicting Detections	61
3.5.2	Measure of Segmentation Quality	62
3.5.3	Optimization algorithm for resolving conflicting segmentations	63
3.6	Case Study: Ensemble Method for Nanoparticle Detection	65
3.6.1	Ensemble versus Individual Segmentation	66
3.6.2	Numerical Performance of the Ensemble Segmentation	67
	References	70
4	Morphology Analysis	75
4.1	Basics of Shape Analysis	75
4.1.1	Landmark Representation	76
4.1.2	Parametric Curve Representation	85
4.2	Shape Analysis of Nanoparticles	89
4.2.1	Shape Analysis for Star-Shaped Nanoparticles	89
4.2.2	Shape Analysis for a Broader Class of Nanoparticles	96
4.2.3	Numerical Examples: Image Segmentation to Nanoparticle Shape Inference	101
4.3	Beyond Shape Analysis: Topological Data Analysis	104
	References	105
5	Location and Dispersion Analysis	109
5.1	Basics of Mixing State Analysis	109
5.2	Quadrat Method	112
5.3	Distance Methods	114
5.3.1	The K Function and L Function	115
5.3.2	The K_{mm} Function	116
5.3.3	The F Function and G Function	118
5.3.4	Additional Notes	119
5.4	A Revised K Function	120
5.4.1	Discretization	120
5.4.2	Adjustment of the Normalizing Parameter	122
5.4.3	Relation Between Discretized K and \tilde{K}	124
5.4.4	Nonparametric Test Procedure	126
5.5	Case Study	128
5.5.1	A Single Image Taken at a Given Time Point	129
5.5.2	Multiple Images Taken at a Given Time Point	131
5.6	Dispersion Analysis of 3D Materials	135
	References	142

6	Lattice Pattern Analysis	145
6.1	Basics of Lattice Pattern Analysis	145
6.2	Simple Spot Detection	148
6.3	Integrated Lattice Analysis	150
6.4	Solution Approach for the Integrated Lattice Analysis	151
6.4.1	Listing L_g 's and Estimating τ	153
6.4.2	Choice of Stopping Condition Constant c and Related Error Bounds	157
6.4.3	Choice of Threshold ρ	158
6.4.4	Comparison to the Sparse Group Lasso	159
6.5	Numerical Examples with Synthetic Datasets	164
6.6	Lattice Analysis for Catalysts	166
6.7	Closing Remark	171
	References	174
7	State Space Modeling for Size Changes	177
7.1	Motivating Background	177
7.1.1	The Problem of Distribution Tracking	178
7.1.2	Nanocrystal Growth Video Data	179
7.2	Single Frame Methods	180
7.2.1	Smoothed Histograms	181
7.2.2	Kernel Density Estimation	182
7.2.3	Penalized B-splines	184
7.3	Multiple Frames Methods	185
7.3.1	Retrospective Analysis	185
7.3.2	Optimization for Density Estimation	188
7.4	State Space Modeling For Online Analysis	190
7.4.1	State Space Model for NPSD	191
7.4.2	Online Updating of State α_t	193
7.4.3	Technical Details of the Gaussian Approximation	196
7.4.4	Curve Smoothness for Distribution Estimation	198
7.5	Parameter Estimation	200
7.5.1	Bayesian Modeling	200
7.5.2	MCMC Sampling	201
7.5.3	Select the Hyper-parameters	202
7.6	Case Study	204
7.6.1	Analysis of the Three Videos	204
7.6.2	Comparison with Alternative Methods	208
7.7	Future Research Need: Learning-on-the-Fly	212
	References	212
8	Dynamic Shape Modeling for Shape Changes	215
8.1	Problem of Shape Distribution Tracking	216
8.2	Dynamic Shape Distribution with Bookstein Shape Coordinates	218
8.2.1	Joint Estimation of Dynamic Shape Distribution	219

8.2.2	Autoregressive Model	220
8.3	Dynamic Shape Distribution with Procrustes Tangent Coordinates	221
8.4	Bayesian Linear Regression Model for Size and Shape	223
8.5	Dynamic Shape Distribution with Parametric Curves	224
8.5.1	Bayesian Regression Modeling for Dynamic Shape Distribution	226
8.5.2	Mixture of Regression Models for Nonparametric Dynamic Shape Distribution	228
8.6	Case Study: Dynamic Shape Distribution Tracking with <i>Ex Situ</i> Measurements	233
8.7	Case Study: Dynamic Shape Distribution Tracking with <i>In situ</i> Measurements	238
